BOSSARD SMART VENDING CLOUD

Access – Usage – Controlled
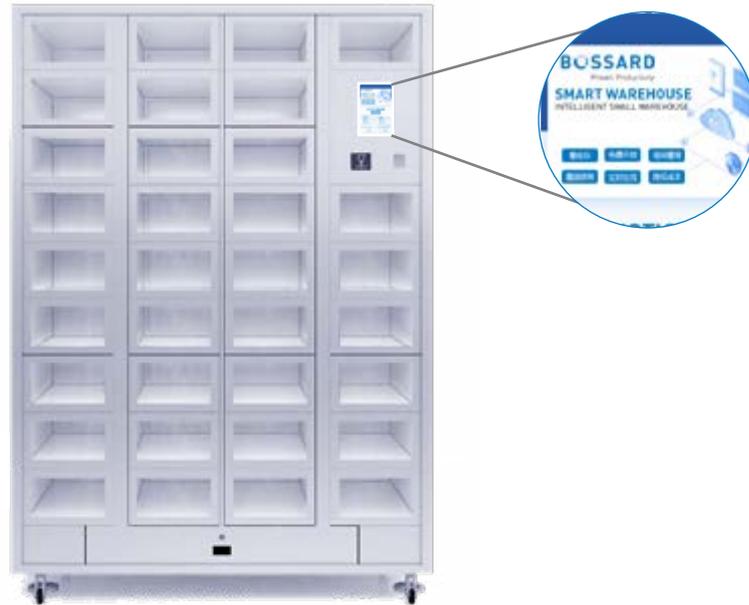

Smart Vending Cloud is a fully automated vending machine, highly intelligent and access controlled inventory system, ideal for storing your consumables and MRO items. The stored items can only be accessed by RFID recognition allowing full Access – Usage – Control. Smart Vending Cloud automatically informs on replenishment needs and inventory data is transmitted to the ARIMS operation dashboard.

HOW IT WORKS

1. CONTINUOUS STOCK MONITORING
Continuous Stock Monitoring. Real Time Feedback.

2. ACCESS CONTROL
The user unlocks doors with a RFID card and withdraws material.

3. USAGE CONTROL
User information and new stock status are transmitted to ARIMS Cloud and can be accessed through a Web API and Mobile App.

4. AUTO REPLENISHMENT
Replenishment triggers automatically once the items are withdrawn

Only available in Asia Pacific Market
