

**PRODUCTS & ASSEMBLY TECHNOLOGIES**

# Heavy duty products

---

**ELECTRICAL FASTENERS**

- Streamline product range due to high sealing and clamping areas
- Steel locking band ensures stable and durable bonding
- High quality design made of sturdy materials

**HIGH STRENGTH BLIND RIVETS**

- Perfect for structural applications
- One side access
- Durable and reliable fixation

**LOCKING FASTENERS**

- Quick and easy installation and dismantling
- High retention of clamp loads
- High vibration and corrosion resistance

**DRAWN ARC WELDING**

- Vibration proof welds resistant to breaking, loosening or weakening
- Faster and easier manufacturing process
- Labor savings as through hole preparation is eliminated

**INSTALLATION EQUIPMENT**

- Ergonomically designed gun built to last
- Wide range of welding equipment to cater for any production volumes and constraints
- More options are available on request

### Industrial applications

Railway Bogie

Pressure vessels

Doors for locomotive

Heat-exchanger

Fuel tanks

Construction machinery
