

EU Directive 2019/1021/EU on the restriction of the Persistent Organic Pollutants (POPs)

Dear Sir/Madam,

We thank you for your query regarding the EU Directive 2019/1021/EU and amended Annex I (08.04.2020) on the restriction of Persistent Organic Pollutants (POPs).

The EU directive referred to above prohibits the use and the introduction of Persistent Organic Pollutants (POPs) from June 20, 2019.

We can confirm that Persistent Organic Pollutants (POPs) are not present in our supplied products.

The products are free of Persistent Organic Pollutants (POPs) at the time of dispatch from our manufacturers. With regard to later contamination, we have no influence. Due to the occurrence of such substances in the environment, it cannot be confirmed that the products of Bossard are free of them after the delivery to our end customers.

Best regards,

Bossard Group
Quality Management
