SUPPLIER CONSOLIDATION SOLUTION

Automatic demand recognition

Seamless order management

Point of use replenishment

Consolidation and delivery

HOW WE MANAGE YOUR INVENTORY

1. Semi and fully automated smart Kanban systems monitor stock levels and trigger replenishment orders.
2. Our collaborative supply chain platform ARIMS sends either a replenishment order directly to the supplier or an order proposal to your ERP.
3. Suppliers prepare the material according to the replenishment order and label them with the location of the item.
4. Depending on the pre-defined agreement, ordered items are consolidated into one shipment. The material is delivered either to the dock or directly to the point of use.

Bossard Supplier Consolidation Solution is your step for a seamless supply of your B- and C-parts.
We would be happy to advise and support you.
