

**BOSSARD SMARTCARD**

# Simple RFID solution

---

This electronic system provides a straightforward and user-friendly process using RFID Kanban cards

Bossard SmartCard is a combination of the original kanban card system and the latest in RFID technology. The system can be implemented easily into every production process.

**SmartCard is ideal for:**

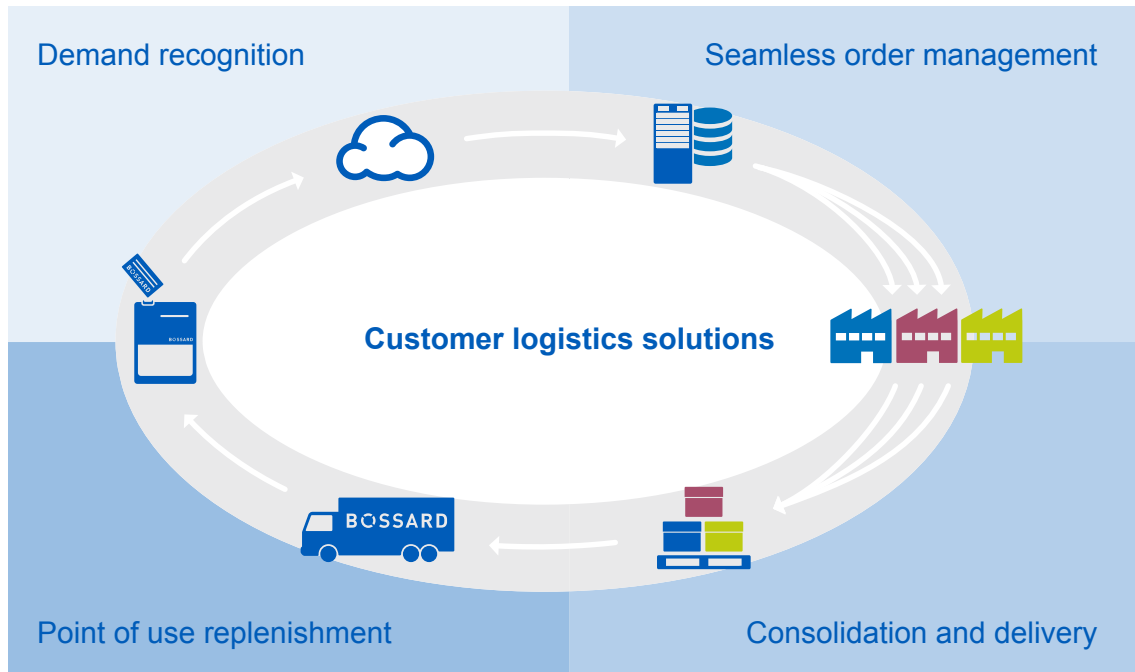

- supermarkets
- line assembly
- point of use

**These strengths characterize SmartCard:**

- simple, user-friendly order process
- use of existing infrastructure
- connection with RFID technology
- trigger orders at the point of use
- access to online platform (ARIMS)
- transparent order statistics
- relief in procurement

**SmartCard offers you the following benefits:**

- lower your total cost of ownership
- increase your efficiency
- enhance your profitability
- more time for your core activities

**BOSSARD SMARTCARD****Order process with Bossard SmartCard**

1. The bins are labelled for easy identification and also equipped with an RFID card.
2. When the minimum stock level is reached, the RFID card is thrown into the electronic mailbox and order information data sent automatically to Bossard.
3. Bossard consolidates the ordered items into one shipment which is sent to the customer.
4. Depending on the pre-defined agreement, we deliver the material either to the dock or directly to the point of use.
