

INNOVATIVE SOLUTIONS

Tailor-made and flexible

DIRAK SNAP-TECHNOLOGY

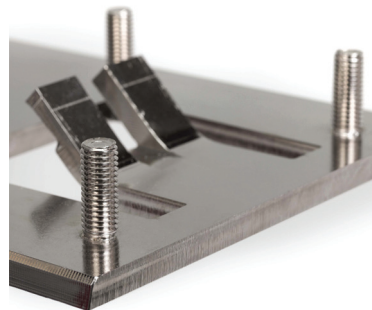

Well - engineered fastening technology ensures innovation and quality. These products slide perfectly through the panel cutout and snap into position, with no possibility for loosening or turning.

- Flexibility
- Convenience
- Strong and secure
- No tools required

**SRM WELDING**

Designed to replace joining methods such as gluing, riveting, or clinching for many applications. HZ-1 studs are unique studs designed to be used with any stud welding processes

- Welding quality improvements
- Possibility to be welded on a wider thickness range
- Unrestricted use in all welding positions
- Studs can be used right to the bottom, no thread wasted

**PROCESS CONTROLLED RIVETING TOOL**

Programmable battery blind rivet nut and blind rivet screw setting tool.

- Intelligent battery management
- Software HST-Tool-Manager
- OLED display
- Job/Process

INNOVATIVE SOLUTIONS

Tailor-made and flexible

Unique solutions

We spend hundreds of hours working together with our customers to achieve a single goal: Providing the most optimum solution tailored to your needs.

Innovative

With our knowledge of assembly methodologies, fastening joints and technical resources, we are able to develop innovative solutions to meet your requirements.
