

**ASSEMBLY TECHNOLOGY EXPERT**

Expert Walk

We take a precise look at where your production happens. We examine all workstations and assembly lines. Our engineering experts study your fasteners and tools in use and determine how to proceed leaner and smarter.

Our expertise lies in providing the right kind of fasteners for your product. We have the right knowledge to find the best one out of our wide range of fasteners which can optimize your product in the production line. The benefits are manifold:

**ASSEMBLY COST REDUCTION****OPTIMIZED PROCESSES****QUALITY IMPROVEMENTS****HIGHER PRODUCTIVITY**

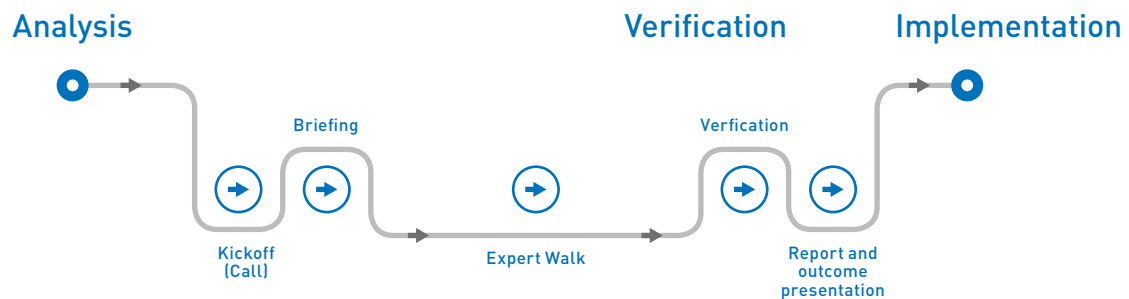

Finding the most fitting fastening solution is essential. Be part of our Expert Walk service and explore three service packages on the next page to achieve the best cost and safety for your product.

EXPERT WALK

Our offerings and service packages for your effective optimization

		BASIC	ADVANCED	SUPERIOR
ANALYSIS	Production Line Analysis A systematic on-site analysis of the entire production line. Investigating the assembly technology, which includes the fastening elements, the assembly processes and the tooling.	✓	✓	✓
	Value Analysis Cost saving estimation based on TCO principle.	✓	✓	✓
VERIFICATION	Technical Verification Possible technical improvements will be verified. Development of proposals for new and proven solutions. A detailed technical report shows the observation.		✓	✓
	Presentation of Proposals Proposal with results is presented in report and presentation. Providing of physical samples.		✓	✓
IMPLEMENTATION	Implementation Plan Detailed design specification and documentation of the new assembly solution.			✓
	Lead Implementation Lead R&D engineering team during implementation phase of proposals.			✓
	Implementation Review Training on- / off-site			✓

EXPERT WALK PROCESS

Do not hesitate to contact us with any questions regarding Expert Walk. We are happy to serve you. Please contact us at: www.bossard.com.
