

BOSSARD INVENTORY MANAGEMENT (BIM)

Supply base consolidation

Bossard takes complete care of the B- and C-parts management and ensures customers efficiency in a sustainable way

Bossard Inventory Management, or BIM, takes reliable care of the full procurement of all B- and C-parts of Bossard and third parties. BIM involves a network of qualified suppliers approved by you. With this solution we provide the highest degree of reliability, the delivery of top-quality products and a seamless supply.

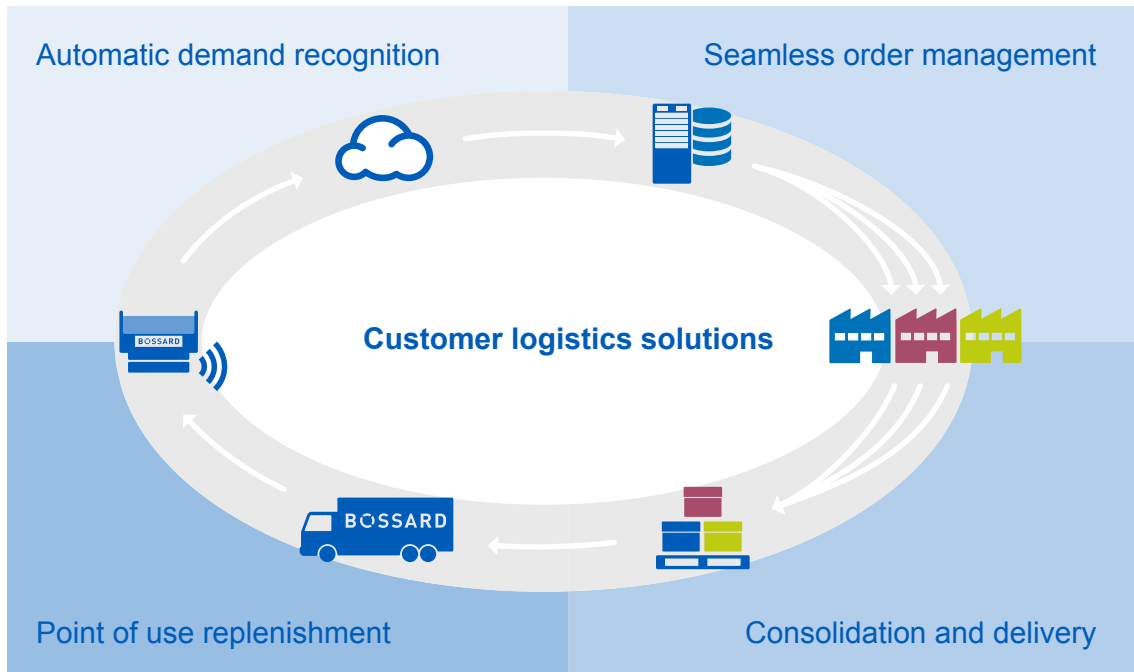

These strengths characterize BIM:

- streamlining of supplier base
- one partner
- full supplier management
- full order management
- automatic flow of information
- coordination of material flow
- integration of existing suppliers
- monthly invoice

BIM offers you the following benefits:

- highest supply guarantee
- reduced stock, less space required
- lower capital commitment
- lean process
- lower your process costs
- less administration
- partner with many years of experience
- lower your total cost of ownership
- increase your efficiency
- enhance your profitability
- more time for your core activities

BOSSARD INVENTORY MANAGEMENT (BIM)

How we manage your inventory

1. Bossard offers several different Kanban systems: SmartBin, SmartLabel, SmartCard, Code, 2Bin. A combination of these systems can be used, depending on your requirements.
2. When the re-order point is reached, data is automatically compiled and sent by Bossard to the suppliers integrated in the B- and C-parts management system.
3. These suppliers prepare the required amounts of the products and label them with the location of the item.
4. Bossard consolidates the ordered items into one shipment which is sent to the customer. Depending on the pre-defined agreement, we deliver the material either to the dock or directly to the point of use.
