

BOSSARD CODE

Simple and intelligent ordering via Smartphone

The new Bossard Code simplifies the ordering of regularly used items. Thanks to the integration into the ARIMS Mobile App, orders can be placed quickly and intuitively. With the smartphone, bins labelled with a barcode or QR code are recorded and the order is transmitted wirelessly.

Moreover, ARIMS Mobile provides you with real-time data from your production at any time so that you have all the functions readily at hand at all times. Find your articles faster than ever or check the status of your deliveries. With ARIMS Mobile you have all information in your pocket.

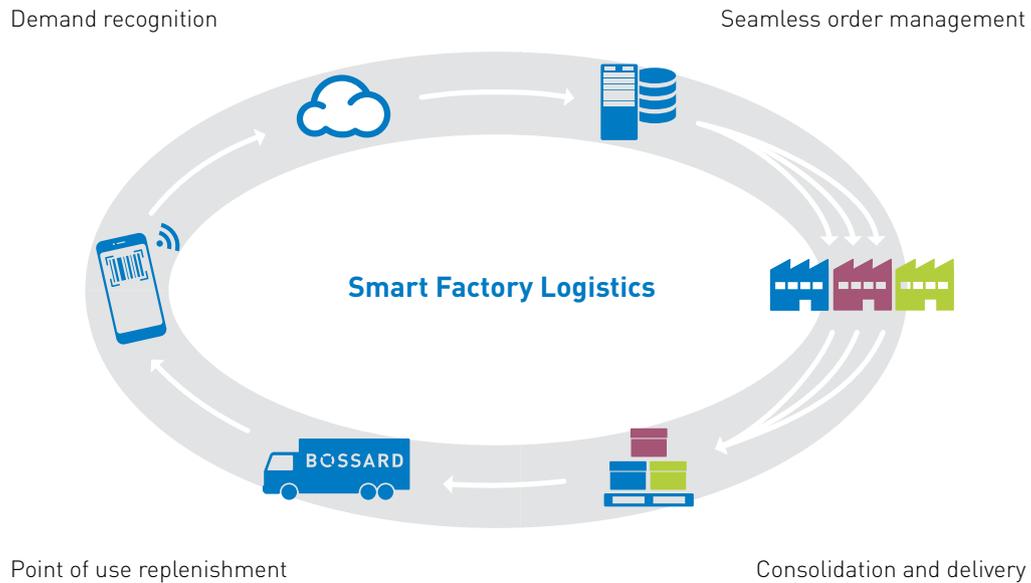

FEATURES

	WIRELESS
	MANUAL ORDER RELEASE
	OFFLINE ORDER PROCESSING
	ADAPTABILITY – Use of existing infrastructure
	MAINTENANCE-FREE
	ARIMS MOBILE – Access to Operation Dashboard

YOUR BENEFITS

- reduced order and delivery time
- increase your efficiency
- maintenance-free
- realtime data
- lower your total cost of ownership
- more time for your core activities
- enhance your profitability

BOSSARD CODE

ORDER PROCESS WITH BOSSARD CODE APP

1. The bins are labelled for easy identification.
2. When minimum levels are reached, the data is recorded via app and orders can be transmitted wirelessly.
3. Bossard consolidates the ordered items into one shipment which is sent to the customer.
4. Depending on the pre-defined agreement, we deliver the material either to the dock or directly to the point of use.

For more information on Bossard Smart Factory Logistics, please refer to our main brochure.

If you have any questions about the Bossard Code App, please feel free to contact us on www.bossard.com.
