

BOSSARD SMARTLOCKER

Automated – intelligent – controlled

SmartLocker is a fully automated, highly intelligent and access controlled inventory system, ideal for storing your consumables and high value items. The stored items can only be accessed by RFID recognition allowing full access- and usage-control. Moreover, SmartLocker automatically informs you on replenishment needs and all relevant inventory data is transmitted to the ARIMS operation dashboard.

FEATURES

	ACCESS CONTROL – via RFID Card
	USAGE CONTROL – per access
	FULLY AUTOMATED
	WEIGHT SENSORS – Physical stock information
	ERROR PROOF – Automated error recognition
	FULL CYCLE CONTROL
	ARIMS – Access to Operation Dashboard

YOUR BENEFITS

- Full usage control per access
- Automated cost center allocation
- Reliable theft protection
- Shortened order and delivery times
- Easy to replenish as inventory repacking is not required
- Clear doors for maximum visibility and accessibility
- Increased efficiency
- Complete process transparency
- Maintenance-free

BOSSARD SMARTLOCKER

HOW IT WORKS

1. CONTINUOUS STOCK MONITORING

SmartLocker permanently monitors stock levels.

2. ACCESS CONTROL

The user unlocks doors with a RFID card and withdraws material.

3. STORAGE CONTROL

SmartLocker determines the new stock levels after the doors are locked.

4. USAGE CONTROL

User information and new stock levels are transmitted to ARIMS and can be accessed through a WEB API.

5. REPLENISHMENT NEEDS

You get automatically informed, if replenishment is needed.

If you have any questions about the Bossard SmartLocker please feel free to contact us on www.bossard.com.
